Priority Action Items & Business Impact

The highest-impact issues discovered during the audit that directly affect search rankings, click-through rates, and customer conversions.

Priority	SEO Factor	Issue Identified	Business Impact	Recommended Action
P1	Content SEO	Factual consistency (no zero-rendered statistics): Statistics render as zero in	Impairs search crawlers or degrades search rank positions.	**Render real figures in the HTML instead of relying on a count-up animation.**
P1	Local SEO	Full postal address published: No postal address found on any of 18 crawled page	Impairs search crawlers or degrades search rank positions.	**Publish the full street address including postal code.**
P1	Conversion SEO	Form captures an email address: The enquiry form has no email field (fields: com	Impairs search crawlers or degrades search rank positions.	**Add a required email field to the enquiry form.**
P2	On-Page SEO	Title uniqueness: 8 exact duplicate title(s) across 1 group(s).	Impairs search crawlers or degrades search rank positions.	**Write a unique title for every page.**
P2	Local SEO	NAP on every page: Name/address/phone appear together on 0 of 18 pages. NAP is a	Impairs search crawlers or degrades search rank positions.	**Put name, address and phone in the site-wide footer.**
P2	Internal Linking	Navigation present and working: Navigation on 18 of 18 pages; 6 broken navigatio	Impairs search crawlers or degrades search rank positions.	**Provide a consistent menu on every page and fix broken menu links.**
P2	Conversion SEO	Form carries page/product context: Fetched 11 context URL(s) (e.g. https://volte	Impairs search crawlers or degrades search rank positions.	**Pre-fill or pre-select the product from the page the visitor came from.**

Quick Wins (Fastest ROI Fixes)

Low-effort optimizations that can be deployed quickly to generate immediate search improvements:

1. Optimize Missing Meta Descriptions Craft compelling 150-160 character descriptions to boost SERP click-through rates.	**2. Fix Broken Internal Links (404s)** Redirect or update broken links to restore crawl equity and user retention.
3. Compress & Add ALT Tags to Images Compress hero assets and provide keyword-relevant alt descriptions for image SEO.	**4. Verify Canonical & Robots Declarations** Ensure search spiders access priority indexable landing pages smoothly.

Strategic Optimization Roadmap

A proven 3-phase execution framework designed to maximize organic traffic and long-term domain authority.

PHASE 1: Foundation (Days 1–14)	PHASE 2: Optimization (Days 15–30)	PHASE 3: Growth (Days 31–60)
• Fix critical 404 links & crawl errors • Configure XML Sitemap & Robots.txt • Resolve duplicate titles & H1 tags • Verify SSL & canonical protocols	• Optimize meta titles & descriptions • Compress heavy media & images • Enhance mobile responsiveness • Implement Schema.org structured data	• Refine internal link equity flow • Expand keyword targeting & copy • Core Web Vitals speed tuning • Monthly ranking & conversion tracking

Audit Standards & Methodology

This audit was compiled via real-time HTTP crawler validation, direct DOM analysis, and Google Webmaster technical standards. Scores reflect strictly verifiable parameters without artificial inflation. Achieving the projected target requires systematic implementation of the technical, structural, and on-page recommendations identified herein.
